

# PEST SNIPER™

*Turn Your Watering System Into A Tactical Weapon*

**DIY**  
Do It Yourself

# What Is Pestigation?

The process of managing unwanted insect pests in and around your home or business by adding a patented injection system, to your existing watering system, to deliver an all natural pest formulation at optimum times and frequency to create a larger pest barrier to manage more insect pests species.

## Is It Safe?

The *50 CAL* pestigation insect formula is approved for use in this system and is all natural and *generally regarded as safe* (GRAS) as outlined under FIFRA 25b exemption established by the Environmental Protection Agency. While this product is toxic to non-beneficial pests it presents no known harmful affects to people, pets or the environment.

## What Are The Advantages?

Pestigation is an affordable and automated process that consistently treats pests on a weekly basis to provide you with a non-toxic solution to pest management. In addition, you will manage more pests over a larger area than any other conventional method in use today. Creates a pest barrier the size of your lawn so you can enjoy pest free living both indoors and outdoors. The *Pest Sniper* system protects you from more pests, *without additional costs*, than traditional pest treatments. (See comparison chart on back page)

**PRECISE & TARGETED  
APPROACH TO PEST ELIMINATION**

*50 CAL* provides a natural insect pest formulation to manage unwanted, non-beneficial, insect pests effectively and safely for humans, pets and our environment. This product uses a *patented process* which creates a unique mode of action to garner highly effective mortality results on a wide range of pests. Due to the manner in which it kills insect pests no resistance to its powerful effects can occur. After the full assault with *50 CAL* pests die rather quickly. To extend the affects a repelling barrier of protection is provided to prevent future unwanted attacks between suggested treatment cycles. Combined with the *Pest Sniper* pestigation system you will have one of the best defenses against pests in the industry today. No need to use toxic chemicals when you can manage pests naturally in this manner. *50 CAL* is non-staining and has a pleasant scent. No re-entry period is required after application. Always follow label directions.
